MAJOR RESEARCH AND ACADEMIC INTERESTS

1. Design, implementation and evaluation of nutrition and physical activity programs for children, school staff, and underserved populations.
2. Dietary and physical activity interventions for prevention of chronic diseases, such as obesity cardiovascular disease, osteoporosis, type 2 diabetes, and cancer.
3. Dissemination of school-based nutrition and physical activity programs for children.
4. Evaluation of legislative policies that address nutrition and physical activity requirements and programs.
5. Development and evaluation of dietary and physical activity assessment techniques.
6. Epidemiologic studies of child nutrition, physical activity and behavioral risk factors for children.
7. Gene-environment interactions.

RESEARCH SUPPORT

Current Funded

8. National Institutes of Health 78/01/2018-06/30/2023
1R01HD097669 Research Grant \$2,462,392 direct costs
Title: Evaluating the Effects of Municipal Funding of Safe Routes to School Infrastructure on Child Physical Activity: A natural experiment
Role: Principal Investigator
The goals of this project are to assess the effects of the Safe Routes to School (SRTS) infrastructure initiative on child physical activity (individual level changes), and to determine if the overall changes in built environment improve the proportion of students who engage in active commuting to school (ACS) in Austin relative to a comparison city (San Antonio) over the study period (population level changes).
7. Michael & Susan Dell Foundation 08/01/2018-07/31/2022
Research Grant \$2,973,583 direct costs

Title: Promoting Healthy Children in a Healthy State

Role: Principal Investigator

The goal of this project is to support a new, more pragmatic approach to using evidence to transform the health of children and families in Central Texas.

6. Texas Department of State Health Services 05/01/2018-08/31/2021
Title: 2019-2020 School Physical Activity and Nutrition (SPAN) Survey \$1,229,399 direct costs
Role: Principal Investigator
The goal of this project is to determine the prevalence of obesity and overweight, as well as obesity-related behaviors such as diet and physical activity, among Texas public school students in grades 2, 4, 8 and 11.
5. Texas Health and Human Services Commission/USDA 06/06/2017-09/30/2018
Title: Evaluation of Texas SNAP-Ed \$837,731 direct costs
Role: Co-Principal Investigator
The goal of this project is to conduct an evaluation of the implementation and utilization of SNAP-ED funding in Texas, specifically to determine if the Texas SNAP-ED plan and initiatives result in positive changes to short term (readiness and capacity) and medium term (behavioral and policy/systems/environmental) outcomes. A future goal includes assessing selected long-term (effectiveness and maintenance) indicators.
4. European Commission 05/01/2018-04/30/2023
Research Grant €9,678,654 total costs
Title: Confronting obesity: Co-creating policy with youth (CO-CREATE)
Role: Investigator (donated time)
This project aims to provide a system map of causes of adolescent overweight and obesity, determining the role of policies in this and establishing the leverage for policies co-created with stakeholders, with an emphasis on empowering youth and youth organizations.
