

November 28, Submitter Forum*

ATTENDEES	
<ul style="list-style-type: none"> • Lee Spangler, Executive Director 	<ul style="list-style-type: none"> • Devin York, Senior Project Manager
<ul style="list-style-type: none"> • Joseph Harrison, Data Process Manager 	<ul style="list-style-type: none"> • Jodie Nassar, Data Operations Manager

AGENDA
<ul style="list-style-type: none"> • 2024 Submitter Forum Schedule • Historical Data File Submission Due Date • Historical Submissions Summary • Creating Support Tickets • Stage 2 Data Quality Engagements • TX-APCD Phone Number • TACC Account Reactivation Instructions Update • 2024 Registration Renewal • Q&A

DISCUSSION TOPICS – Q&A

General

1. General comments from the Center:

The Center thanks everyone for participating in this submitter forum. The answers provided here are our best understanding of the questions submitted. As always, something may get lost in translation. If there needs to be further clarification on any question, please submit a ticket and we can start that dialogue.

Some questions may have been repeated from the last Q&A as they are still pertinent.

Notifications

As stated in the submitter forum, the TX-APCD will begin accepting monthly submissions on July 1, 2023, for March 2023 adjudicated data. Historical submissions will be accepted from August 1, 2023 –

* Some questions submitted have been edited for clarity.

December 31, 2023, to include data from January 2019 – February 2023 (assumes you begin monthly submission in July 2023).

Notifications may be found on our website at: <https://go.uth.edu/txapcd> (Texas All-Payor Claims Database – Rule Notifications).

Each and every file submitted to the TX-APCD is for a single year-month to include a maximum of five files (eligibility, provider, medical claims, pharmacy claims, and dental claims) in a single .zip file named as required in the Data Submission Guide.

Common Data Layout

2. Is there a timeline for a new CDL to be adopted?

We intend to use the current version of the CDL for the foreseeable future. To implement a new CDL version requires the TX-APCD to go back through the rule-making process. Also, for any future CDL release, we would give submitters plenty of lead-time to submit test files against the new CDL. The TX-APCD has issued Errata for the CDL and has posted that on the TX-APCD website at: <https://go.uth.edu/txapcd> – TX-APCD Payor Registration and Information tab (scroll down to middle of page under Technical Guides).

This answer is a repost from the Q&A from the April 2023 Submitter Forum Q&A.

Registration

3. Can you please clarify on the registration renewal if we should report 'provider billed' or 'plan paid' amount in the 'Total Claims Value' field?

For registration renewal, the Total Claims Value field should be the **Total Amount Paid**. This answer was provided in the FAQs on the APCD public website at: <https://sph.uth.edu/research/centers/center-for-health-care-data/texas-all-payor-claims-database/frequently-asked-questions/>.

To streamline the registration process, the TX-APCD provided a registration form with known information and highlighted fields that need review. You may use this provided form or start a new form, either is fine with the TX-APCD. In either case, annual registration is due by December 31, 2023.

Extensions and Exceptions

4. Based on the provided submission notification, when is the deadline to submit an extension?

According to TDI regulations, a required submitter may submit a “request for an extension to the Center before the reporting due date...” and is otherwise silent on timing, unlike exception requests. However,

required submitters should note the Center is permitted at least 14 calendar days to consider an extension request (with additional time should the Center request additional information). The 14-day minimum time-period should be considered when deciding upon the timing for extension requests.

5. After testing, we find that we need to submit an exception request for some items. I see there is a form on the portal. What is the process/timing to submit that request.

*According to the rule, a payor may request a temporary exception from one or more requirements by "...submitting a request to the Center **no less than 30 calendar days before** the date the payor is otherwise required to comply with the requirement.". The Center is permitted 14 calendar days to consider the request.*

6. Does the one-year extension start from when it goes live or another date?

Extensions and exceptions are typically granted based on calendar year and expires December 31st in the year in which it was granted.

7. Our test files failed because some fields didn't meet the minimum thresholds. If we file an exception, we shouldn't fail next time?

Yes, exception requests are available for submitters who cannot meet the requirements for a particular field in the CDL. Please complete the Exception Request Form and Exception Threshold Spreadsheet. Please send both forms to txapcd@uth.tmc.edu. As a reminder, exception and extension requests require approval from the TX-APCD.

8. We have submitted an extension request through December 31, 2023, what do we need to do to request an extension for any historical months?

Please review your current granted extension request as it may include historical months; if not, please submit a new extension request covering any historical periods for which you will not be complying with the data submission window. The historical period submission window closes December 31, 2023. An extension for a current period does not necessarily include historical periods.

File Submission

9. Do you have list of data quality checks outside of the File Level Checks and Field Level checks? If data quality errors occur in production, will the ticketing system be leveraged to find which data quality errors were found, or will those be sent in an email notification?

The TX-APCD is currently working on a list of data-quality checks to provide to submitters. If quality errors occur in production, the TX-APCD will reach-out via the ticketing system and email to discuss the quality issues and potential remedies. From this discussion, a rectification plan will be agreed upon and executed.

10. Although as we've learned later, 2019 applies to adjudication date not the service date, which can occur before 2019?

Yes, all data submissions are keyed to adjudication date. That will mean claims for a data period will include dates of service that may be much earlier.

Miscellaneous

11. How often will these sessions be held or is this a one-time call?

The TX-APCD has changed the submitter forum to accommodate groups in different time zones. These meetings will be held on the 4th Tuesday of the month at 12:30 PM CT. Based on submitter feedback, we plan on going to a two-month cadence. Starting with our first submitter forum in January 2024, the meetings will occur every other month (March, May, July, September, November).

Security

12. We have a team that helps with the submissions of the files and want to have access to the portal. Do each one of them have to have their own login?

Yes! TACC's security policy is that everyone accessing the system should create an individual account. The TX-APCD is designed so that multiple accounts can be associated with a registrant. TACC's security policy also does not allow the sharing of accounts, which is a standard security best practice.

13. Can we get a copy of the slides?

Yes, the slides will be posted at <https://go.uth.edu/txapcd> – (Texas All-Payor Claims Database – Submitter Registration & Info).
